Cambridge
Dictionary

Meaning of **controversy** in English

controversy

noun [C or U]

UK /'kɒn.trə.vɜː.si/ /kən'trɒv.ə.si/ US /'kɑːn.trə.vɜː.si/

Add to word list

C1

a lot of disagreement or argument about something, usually because it affects or is important to many people:

- **controversy surrounding/over** *There was a big controversy surrounding/over the use of drugs in athletics.*
- **fierce/heated controversy** *The policy has caused fierce/heated controversy ever since it was introduced.*

COLORADO STATE FAIR'S ART COMPETITION - 2022

COLORADO STATE FAIR'S ART COMPETITION (BLUE RIBBON AWARD — EMERGING DIGITAL ARTISTS)

An A.I.-Generated Picture Won an Art Prize. Artists Aren't Happy.

"I won, and I didn't break any rules," the artwork's creator says.

Sept. 2, 2022

This year, the Colorado State Fair's annual art competition gave out prizes in all the usual categories: painting, quilting, sculpture.

But one entrant, Jason M. Allen of Pueblo West, Colo., didn't make his entry with a brush or a lump of clay. He created it with Midjourney, an artificial intelligence program that turns lines of text into hyper-realistic graphics.

Mr. Allen's work, "Théâtre D'opéra Spatial," took home the blue ribbon in the fair's contest for emerging digital artists — making it one of the first A.I.-generated pieces to win such a prize, and setting off a fierce backlash from artists who accused him of, essentially, cheating.

Reached by phone on Wednesday, Mr. Allen defended his work. He said that he had made clear that his work — which was submitted under the name "Jason M. Allen via Midjourney" — was created using A.I., and that he hadn't deceived anyone about its origins.

ARTSTATION

SONY WORLD PHOTOGRAPHY AWARD 2023 (CREATIVE CATEGORY)

German photographer Boris Eldagsen, who won the Creative category of the prestigious Sony World Photography Award, has refused the prize on the grounds that he used an artificial intelligence image generator to create his submission. The prizewinning “photo,” titled *Pseudomnesia: The Electrician*, depicts what Eldagsen characterized in his submission as “a haunting black-and-white portrait of two women from different generations, reminiscent of the visual language of 1940s family portraits.” In fact, Eldagsen made the work by supplying prompts to the image generator DALL-E 2, which was developed by OpenAI, the Bay Area company responsible for AI chatbot ChatGPT.

“MY GOAL WAS TO OPEN A DISCUSSION,
AND I SUCCEEDED,”

ELDAGSEN, A 52-YEAR-OLD PHOTOGRAPHER FROM BERLIN

Celebrating the Art of Photography

“I entered this actual photo into the AI category of 1839 Awards to prove that human-made content has not lost its relevance, that Mother Nature and her human interpreters can still beat the machine, and that creativity and emotion are more than just a string of digits,” Astray wrote. “There were ethical concerns, of course, so I was hoping that the jury and the audience would find that this jab at AI and its ethical implications outweighs the ethical implications of deceiving the viewer, which, of course, is ironic because that is what AI does.”

Getty Images is suing Stability AI, creators of popular AI art tool Stable Diffusion, over alleged copyright violation. In a press statement, the stock photo company said it believes that Stability AI “unlawfully copied and processed millions of images protected by copyright” to train its software and that Getty Images has “commenced legal proceedings in the High Court of Justice in London” against the firm.

Getty Images Statement

Jan 17, 2023 | [PDF](#)

This week Getty Images commenced legal proceedings in the High Court of Justice in London against Stability AI claiming Stability AI infringed intellectual property rights including copyright in content owned or represented by Getty Images. It is Getty Images' position that Stability AI unlawfully copied and processed millions of images protected by copyright and the associated metadata owned or represented by Getty Images absent a license to benefit Stability AI's commercial interests and to the detriment of the content creators.

Getty Images believes artificial intelligence has the potential to stimulate creative endeavors. Accordingly, Getty Images provided licenses to leading technology innovators for purposes related to training artificial intelligence systems in a manner that respects personal and intellectual property rights. Stability AI did not seek any such license from Getty Images and instead, we believe, chose to ignore viable licensing options and long-standing legal protections in pursuit of their stand-alone commercial interests.

Getty Images Launches Commercially Safe Generative AI Offering

Sep 25, 2023 | PDF

Trained on Getty Images' world-class creative content, Generative AI by Getty Images allows customers to explore the power of generative AI with full protection and usage rights

New York – September 25, 2023: Getty Images (NYSE: GETY), a preeminent global visual content creator and marketplace, today announced the launch of *Generative AI by Getty Images*, a new tool that pairs the company's best-in-class creative content with the latest AI technology for a commercially safe generative AI tool.

Generative AI by Getty Images is trained on the state-of-the-art Edify model architecture, which is part of NVIDIA Picasso, a foundry for generative AI models for visual design. The tool is trained solely from Getty Images' vast creative library, including exclusive premium content, with full indemnification for commercial use. Sitting alongside the company's broader, industry-leading services, *Generative AI by Getty Images* works seamlessly with the company's expansive library of authentic and compelling visuals and Custom Content solutions, allowing customers to elevate their entire end-to-end creative process to find the right visual content for any need.

"We're excited to launch a tool that harnesses the power of generative AI to address our customers' commercial needs while respecting the intellectual property of creators," said **Craig Peters, CEO at Getty Images**. "We've worked hard to develop a responsible tool that gives customers confidence in visuals produced by generative AI for commercial purposes."

Customers creating and downloading visuals through the tool will receive Getty Images' standard royalty-free license, which includes representations and warranties, uncapped indemnification, and the right to perpetual, worldwide, nonexclusive use in all media. Content generated through the tool will not be added into existing Getty Images and iStock content libraries for others to license. Further, contributors will be compensated for any inclusion of their content in the training set.

"We've listened to customers about the swift growth of generative AI – and have heard both excitement and hesitation – and tried to be intentional around how we developed our own tool," said **Grant Farhall, Chief Product Officer at Getty Images**. "We've created a service that allows brands and marketers to safely embrace AI and stretch their creative possibilities, while compensating creators for inclusion of their visuals in the underlying training sets."

Generative AI by Getty Images can now be enabled on GettyImages.com. Customers can also choose to integrate the service into their existing workflows and applications through an available API.

Customers will soon be able to customize *Generative AI by Getty Images* with proprietary data to produce images with their unique brand style and language. This and other service advancements will be added later this year. Learn more about *Generative AI by Getty Images*, how to get access, and Getty Images' stance on responsible AI practices: <https://www.gettyimages.com/ai/generation/about>

WRITERS GUILD
OF AMERICA
STRIKE

2023 WRITERS GUILD OF AMERICA (WGA) (MAY 2 TO SEPT 27, 2023)

From May 2 to September 27, 2023, the Writers Guild of America (WGA)—representing 11,500 screenwriters^[2]—went on strike over a labor dispute with the Alliance of Motion Picture and Television Producers (AMPTP). The 148-day strike was the longest interruption to American film and television production since the COVID-19 pandemic, as well as the second longest labor stoppage that the WGA has performed since the strike of 1988, which lasted for 153 days.

Goals :

- Increase funding and job security for writers
- Increase the size of writers' rooms
- Limit the use of artificial intelligence in the writing process

2023 SAG-AFTRA STRIKE

2023 SAG-AFTRA STRIKE

The **2023 SAG-AFTRA strike** is an ongoing strike action that began on July 14, 2023. The American actors' union SAG-AFTRA (Screen Actors Guild – American Federation of Television and Radio Artists) went on strike over an ongoing labor dispute with the Alliance of Motion Picture and Television Producers (AMPTP).

Caused by :

- Lack of agreement on a new contract between SAG-AFTRA and the AMPTP
- Disagreement over streaming residuals and regulation of self-tape auditions
- Studio usage of artificial intelligence (AI) to scan actors' faces to generate performances digitally

The image features a dark gray background with a subtle gradient. In the corners, there are several realistic-looking bubbles of various sizes, some overlapping, creating a decorative frame. The bubbles have highlights and shadows, giving them a three-dimensional appearance.

When Reid Southen, a movie concept artist based in Michigan, tried an A.I. image generator for the first time, he was intrigued by its power to transform simple text prompts into images.

But after he learned how A.I. systems were [trained on other people's artwork](#), his curiosity gave way to more unsettling thoughts: Were the tools exploiting artists and violating copyrights in the process?

Inspired by tests he saw circulating online, he asked Midjourney, an A.I. image generator, to create an image of Joaquin Phoenix from “The Joker.” In seconds, the system made an image nearly identical to a frame from the 2019 film.

tissue regeneration, immunomodulation, and advancements in regenerative medicine. This review delves into the historical background and biological characteristics of SSCs, with a particular emphasis on the pivotal role of the JAK/STAT signaling pathway in their proliferation, maturation, and differentiation processes. Research indicates that the JAK/STAT pathway extensively influences various functionalities of spermatogonial stem cells, encompassing immunomodulation, tissue differentiation, homing, and adaptation to the microenvironment. Herein, we collate and dissect related studies, shedding

AI errors over Malaysia's Jalur Gemilang flag spark national pride and controversy

Recent inaccuracies in the national flag's depiction have upset the public, where even small errors are seen as national insults

The [Malaysian](#) flag, known as the Jalur Gemilang or Stripes of Glory, is a highly respected symbol of national unity, but has recently been embroiled in controversies due to inappropriate representations, prompting public backlash and an apology from a government ministry.

This revered symbol knits together a multiethnic nation with various fault lines and is proudly displayed in homes, classrooms, and government buildings.

Malaysia's education ministry apologised for sharing an AI-generated image of a classroom featuring the national flag with two crescent moons. Photo: X/OscarToo8tv

WHAT'S AHEAD ?

Three artists have launched a class-action lawsuit against Stable Diffusion with a lawyer also litigating against GitHub CoPilot, an AI-powered programming tool trained on publicly available code from GitHub.

The suit alleges that "Stable Diffusion contains unauthorised copies of millions – and possibly billions – of copy righted images," and seeks to use existing copyright law to sue Midjourney, Stability AI and DeviantArt.

Getty Images has also filed a suit against Stable Diffusion, and the Concept Art Association has raised over \$200,000 to pay for a government lobbyist in the US, with the intention of updating laws to ensure artists' interests are protected.

COMMENT FOR OPEN-DISCUSSION ?

Alongside the ethical issue of artists' work being used without permission is the question of the extent to which AI art poses a threat to the livelihoods of artists. It's often pointed out that AI can't do the kind of problem-solving that's core to the role of a professional artist, so do they really need to worry?

"I think they have the potential to become a serious threat to working artists in the future if they don't get regulated," says Kraus. "We already see AI images being used on book and magazine covers, to illustrate articles, and even Netflix experimenting with using AI for its anime Dog and Boy."
